

Practical Guide to COVID-19 Immunization

Providing answers to your patients

You are invited to join a webinar on the **Practical Guide to COVID-19 Immunization – Providing answers to your patients** hosted by **Infectious Disease Specialists Dr. Allison McGeer, Dr. Angel Chu, and Dr. Cécile Tremblay**. You will have the opportunity to review and discuss the latest recommendations and evidence surrounding the COVID-19 vaccines.

Learning objectives:

- Identify the main results of the pivotal trials for the mRNA and viral vector vaccines currently being used in COVID-19 vaccination programs in Canada
- Evaluate the most recent real-world evidence on vaccine safety and effectiveness against SARS-CoV-2 and COVID-19
- Discuss the practical considerations associated with administration of the COVID-19 vaccines authorized in Canada
- Discuss the rationale behind the current National Advisory Committee on Immunization (NACI) recommendations on COVID-19 immunization

The webinar will be presented four times in April and May to facilitate access across Canada. They will be recorded and available on-demand for registrants only. Registrants will receive a link to the recording. More dates to be released for a webinar series in late May.

Register for any of the upcoming webinars by scanning the QR code or by:
